PROYECTO VALLE DE NACO

Date 5/25/95

Substance CERAMIC

Lot Number 10A/100

Object Ladle censer

Cat No:

10A/100-1

Multiples? (u, b, c, etc.)

N/A

Cat by. 78

Drawn by.

Full Description:

Paste Group (censers + figurines): A Thickness 0.9cm

Form (censers):

Height 6.9cm

Width 5.7cm

Diameter —

Handle width —

Handle thickness —

Full

Verbal Description

Pierced ladle censer; rim fragment with no handle attachments visible. One partial pierce visible toward the bottom, 0.8cm in diameter, apparently punched from the exterior to the interior. No firing core is present - perhaps because heating or altered the piece so much that the fired area ~~was~~ extends into the paste some 0.4cm from the interior. The paste is "gritty" with many small inclusions (10%). The exterior is not well finished and bumpy and the interior is not much better. Light firing has affected both the interior and exterior - but the interior is altered to a greater extent. Some smoke marking appears at the rim on the interior. There is a small fragment of ^{red} paint encompassing the pierce toward the bottom running horizontal - apparently painted after the pierce was made, as some of the paint has seeped down into the pierce hole; only 0.6cm (wide) of the paint remains. No paint, slip, or other decoration visible.
